

BREAKFAST FOR GRADE 4

We are so excited about our term ahead as we finish writing and publishing our Hero's Journey and begin our work on chemical science and the changes we see in our food. We would love to start this exciting unit with a breakfast at school where we look at the changes in eggs, bacon, bread and butter, cereal and milk, as we cook and eat a nutritious and delicious breakfast. We are specifically focusing on changes that are reversible and irreversible as we heat, cool and dissolve ingredients. In order to add to the fun we thought we could come to school in our pyjamas for breakfast with our uniform packed in our bag to get changed at school. We are hoping that everyone could be at school at 8 am... you can always have some cereal at home if you are a particularly early riser.

SO....

On Tuesday 9th May be at school at 8.00 am in your pyjamas ready to cook and eat breakfast.

Remember to bring your uniform along to get changed later.

We are hoping that 4 parents will be able to help with the cooking and cleaning up so let us know if you are available.

There is no cost for this fun breakfast as Jennie and I will be providing breakfast for the students. 😊
