

Year 4 CHEMICAL SCIENCE 2017

FOOD FEST

Date: Term 2, 2017
Time: Throughout term 2
Cost: \$10.00
Venue: Incursion in class

PAYMENT DUE: Wednesday 10th May, 2017 via Qkr please

(no late payments can be accepted after the due date unless prior arrangements are made via the school office)

As part of our Integrated learning program this year, students in year 4 will be participating in an exciting journey focusing on how and why food changes. This is linked to the chemical science section of the curriculum in grade 4 and we will be approaching it through all areas of our work. We will be exploring the types of food our multicultural background includes and sharing recipes and cooking dishes from all around the world. We will then be designing the packaging to serve this food at a Food Fest at the end of term where parents and students will be able to share what we have prepared. After the Food Fest we will be analysing the decomposition of the food and the packaging ...(festy food or food fest?). In order to purchase the ingredients for our program we are asking parents to please make a payment of \$10.00. Finally we will be producing a recipe book for all children to keep and use at home after our exciting term of cooking and investigating Food and how it changes.

Thank you and kind regards from Pauleen Jennie and Trish.
