

# Our Forest learning Space!

*Learning with nature!*

Today was our second adventure outside into our Forest Learning Space, again we were pretty excited.

We had a quick chat about the rules of Forest Kinder, we all remembered them and were excitedly waiting for the Grade Five's and Michelle to arrive.

The day was beautiful and sunny and we were ready to go!

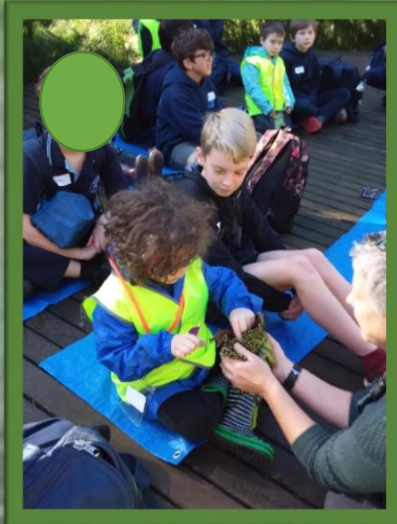

# Day 2

## *Learning with nature!*

Michelle's magical bag!

Choosing our colour shards from Michelle's special bag

We headed down to the stage area and sat down with our buddies on our special tarps. Michelle had a "magical bag", that she had found at the bottom of a rainbow - we were so excited! Inside the bag were all the colours of the rainbow, so many colours.

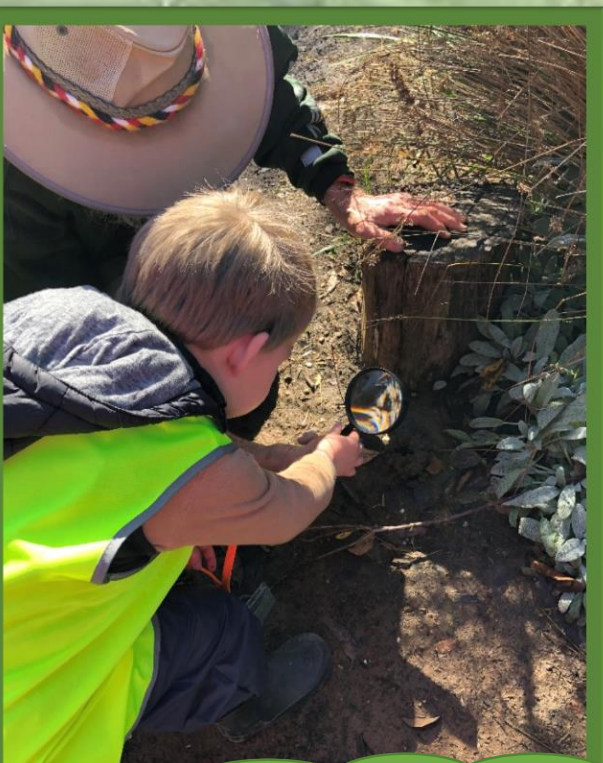

Our job was to choose some colours and match them to nature; in the gardens, in the plants and even the sky.

# Day 2

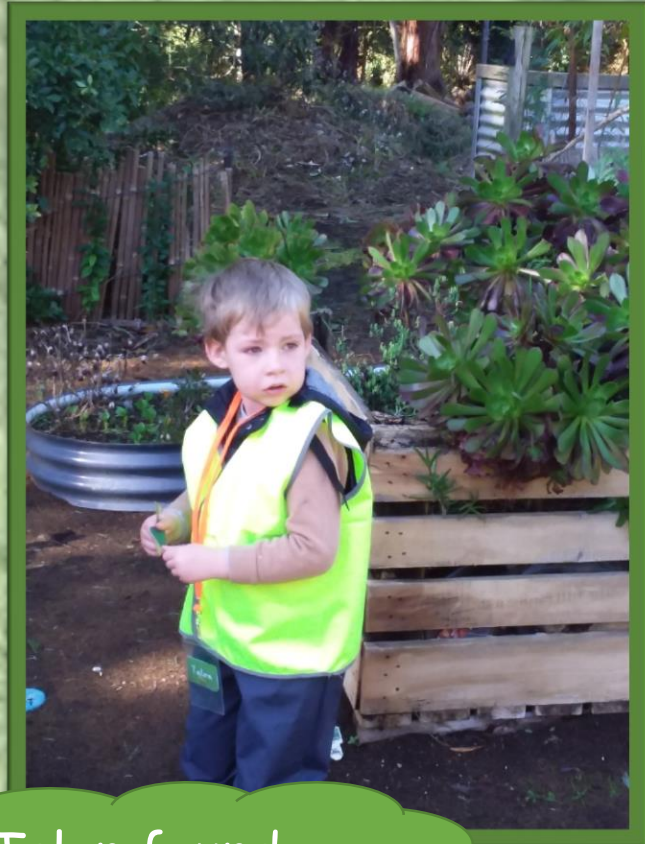

*Learning with nature!*

Choosing our colour shards from Michelle's special bag

Talon doing some matching with Rob

Yay, Talon found it!

## Day 2

*Learning with nature!*

Patrick, Heath  
and Talon all  
matching an  
orange colour to  
the fruit tree

There were so many colours to match, we were allowed to explore in the veggie garden, the maze, the alphabet garden and around the stage to find our colours. It was amazing how many colours we could find when we looked hard!

Success  
for Elliott

Harry  
taking the  
long way!

Harry matching  
with his buddies!

## Day 2

*Learning with nature!*

A helping hand  
for Tyreese!

Back we went to the stage, this time we were going to use our noses, yes our noses! Michelle has some special sponges to help us smell, we "painted" on moustaches, these helped clear our noses so the smells were strong and clear. And off we went again!

What can  
we  
smell!?!??

# Day 2

*Learning with nature!*

Then we moved down near the creek, and Michelle had lots of trees for us to help plant. The Patch School Children have been planting for World Environment Day. We were going to have a turn to plant some new plants. When these plants get bigger the wildlife will use them for homes and to eat from.

Jaylan

Violet

# Day 2

*Learning with nature!*

First our Grade Five Buddy dug a hole for the plant, then we took the plant out of the pot and put it on the ground. We put the soil back over the roots of the plant and then put a special cover around the plant. Violet correctly told us the cover was "to protect" the plant!

# Day 2

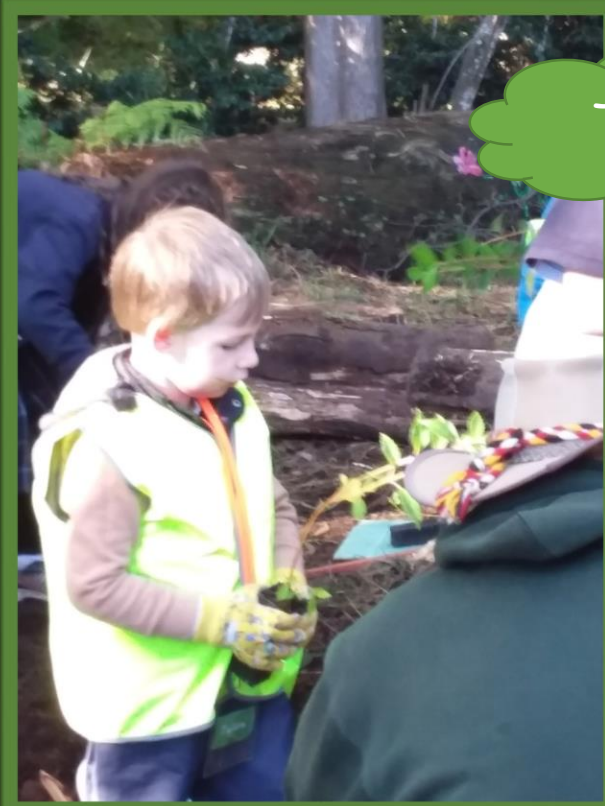

*Learning with nature!*

Harry

Chase

Talon

Leo

Our visit was extra special for Harry today, as his cousins joined him to be his buddies for the session!

## Day 2

*Learning with nature!*

After our planting we washed our hands and had some lunch under the trees with our buddies in the sun.

Bunjl even came to see us on this magical sunny day at The Patch
